2 *General Provisions*

(1)   These intraday timings and market messages set forth procedures for Market Coupling.

(2)   Intraday and market messages are defined in accordance with Complementary Regional Intraday Auction.

(3)   Market Coupling is divided into three separate processes:

a) Pre-Coupling process (Publication time for CZCs);

b) Coupling process;

c) Post-Coupling process (Publication of Market Coupling results).

(4)   Depending on the market situation, following intraday auction timings will apply for each Market Coupling process:

a) Regular timings; or

b) Back-Up timings; or

c) Fall-back timings

(5)   BSP may in case of back-up timings and fall-back timings on Italian-Slovenian interconnector provide to Market Participants Intraday auction market messages (CRIDA) by e-mail.

2.1 *Gate Closure Time*

(1)   Gate closure time is the time until which Market Participants can enter and manage their orders.

(2)   Gate closure time for ID1 (MI1) is set to 15:00 CET.

(3)   Gate closure from ID2 (MI2) is set to 22:00 CET.

(4)   Gate closure from ID3 (MI3) is set to 10:00 CET.

2.2 *Full Decoupling*

(1)   Declaration of full decoupling is a situation where IT-SI and IT-GR interconnector is decoupled if Market Coupling cannot produce correct results by a given hour. In that case fall-back timings will apply for Market Coupling process.
