## Trading report for the year 2018

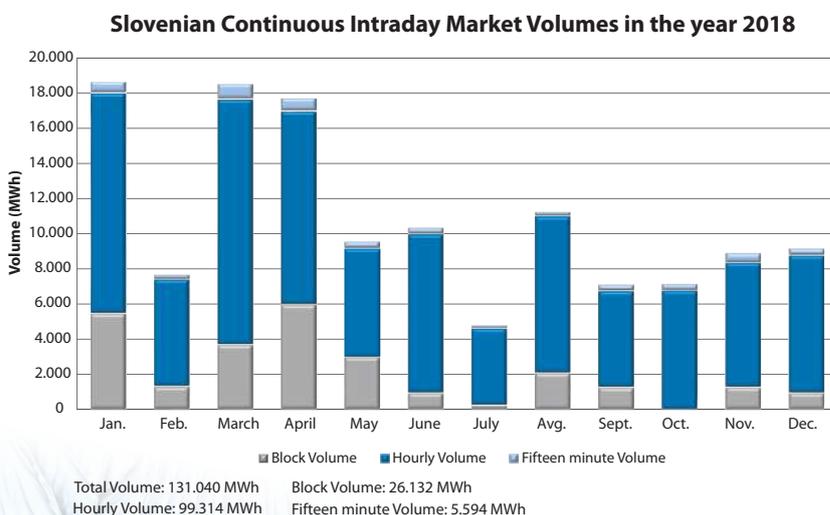

Total traded volume in the year 2018 exceeded 7,7 TWh, whereas the volume on Day ahead reached 7.442 GWh and on Intraday 331,103 GWh.

In the year 2018 the total volume of concluded transactions on Day-Ahead segment amounted to 7.442.113 MWh, which represented 56 % of the Slovenian market consumption. The maximum daily volume in the year 2018 reached 34.376 MWh and took place on the 12<sup>th</sup> March. The maximum hourly volume, an amount of 1.838 MWh was realised on the delivery day of 29<sup>th</sup> October for the 4<sup>th</sup> hour.

## Continuous Intraday Trading report for the year 2018

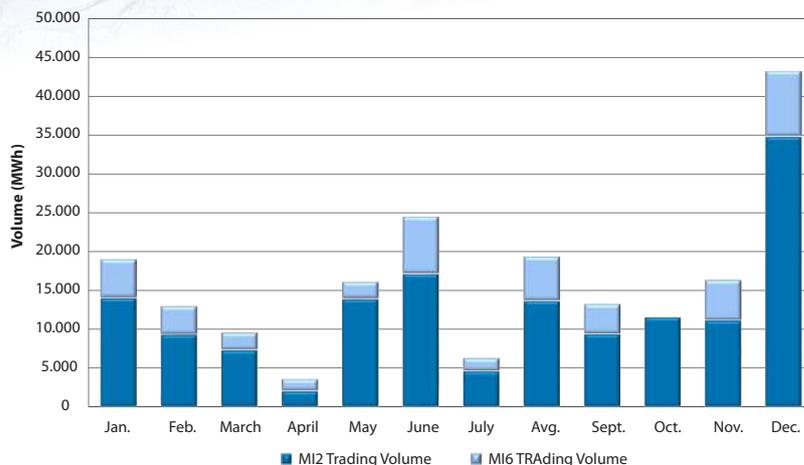

In the year 2018 the total trading volume reached 131.040 MWh. In the same period a total volume of 26.132 MWh was concluded with block products, 99.314 MWh with hourly products and 5.594 MWh with 15 minute products.

## Implicit Auction Intraday Trading report for the year 2018

In the year 2018 the total amount of 200.062,904 MWh was traded. In the same period the total amount of offered daily capacities for both sessions, in the direction from Slovenia to Italy amounted to 1.418.857 MWh. Through the implicit allocation at BSP, 61.329,790 MWh of the offered capacities were allocated. In the direction from Italy to Slovenia the total amount of offered daily capacities was 5.619.689 MWh and 97.230,494 MWh were allocated.

Slovenian Auction Intraday Market Volumes in the year 2018

## Implemented Products & Completed Projects in 2018

Additional liquidity boost

### Day-ahead market coupling on Slovenian-Croatian border

Based on our experience of launching implicit auctions on the Slovenian-Italian and Slovenian-Austrian borders, we expected that the go-live of fully integrated Slovenian bidding

zone will give the Slovenian spot power market an additional liquidity boost. Considering the large volumes of available cross-zonal capacity on Slovenian – Croatian border, this **indeed did further strengthen the robustness of Slovenian electricity price index SIPX**. Day-ahead trading volume in the 2nd half of 2018 was **7,4 % higher** in comparison to the same period in 2017.

## NEW – Introduction of Slovenian power futures

Ljubljana, 25th October 2018. A workshop about introducing slovenian long-term financial products on EEX (European Energy Exchange AG) took place at Kristalna palača in Ljubljana.

Mr. Steffen Riediger (Head of European Power Derivatives at EEX) expressed his opinion, that the need for implementing slovenian long-term financial products already exists for quite some time on the market. The market has reached its maturity and trust, but still has a big potential for substantial growth. European Energy Exchange currently offers trading power futures for 17 markets.

Trading with slovenian long-term financial products will become possible in the Q2 2019. "This will enable traders to hedge against price risks up to 6 years in advance", mentioned CEO of BSP SouthPool Energy Exchange Mr. Anže Predovnik. There will be possible to trade yearly, quarterly, monthly and weekly products. Slovenian power exchange index for day-ahead trading (SIPX) will therefore become an underlying for the future electricity price calculations.

## XBID - 2<sup>nd</sup> wave update

Preparations are now underway for a 2nd wave go-live which is expected to be launched in 2019. The following countries are actively involved in this expansion: Bulgaria, Croatia, Czech Republic, Hungary, Poland, Romania and Slovenia, together with the bordering countries who are already operational from the 1st go-live. The borders which will take part in this 2nd wave go-live will be confirmed in spring 2019.

## Apply for the next Traders' Course

Exchange Trader Training Course offers professional training and examination for traders wishing to trade on BSP SouthPool Markets. Skills supplementation can also be attended by those who wish to obtain new knowledge in electricity trading.

Secure your seat for the 21st of March and [APPLY](#)

## NEW MEMBER ON BSP – GEN ENERGIJA, d.o.o.

GEN energija is the parent company in the GEN Group that generates electricity from sustainable, low-carbon energy sources (nuclear, hydro and solar power). Annual output of their power plants ranges between 5.600 and 6.300 GWh of electricity, accounting for more than 40 percent of total electricity production in Slovenia.

## Independent Software Vendors (ISVs)

Members of BSP can now enjoy the benefits of automated trading via three independent software vendors, who have already successfully tested their connection with BSP Intraday trading platform (M7 ComTrader). Their contact details are available on the the following [webpage](#).
